Nationalism, Social Movements, and Activism in Contemporary Society: Emerging Research and Opportunities

Research Ethics and Social Movements Scholarship Activism and Knowledge Production

The Blackwell Companion to Social Movements

"Discusses the relevance of the reigning paradigms of Sanskritization and Islamization in the study of religious movements"--

Media Activist Research Ethics

The Blackwell Companion to Social Movements is a compilation of original, state-of-the-art essays by internationally recognized scholars on an array of topics in the field of social movement studies. Contains original, state-of-the-art essays by internationally recognized scholars Covers a wide array of topics in the field of social movement studies Features a valuable introduction by the editors which maps the field, and helps situate the study of social movements within other disciplines Includes coverage of historical, political, and cultural contexts; leadership organizational dynamics; social networks and participation; consequences and outcomes; and case studies of major social movements Offers the most comprehensive discussion of social movements available

Globalization, Social Movements, and Peacebuilding

This book explores the relationship between social movements, sexual citizenship and change in the context of Southern Europe. Providing a comparative analysis about LGBT issues in Italy, Spain and Portugal, it discusses how activism can generate political, legal and cultural change in post-dictatorial, Catholic and EU-focused countries. The significance of Portugal regarding sexual citizenship stems from the impressive pace at which LGBT rights were granted after the emergence of a LGBT movement. In some respects, Portugal led the way for LGBT rights in Europe. Offering a close engagement with sociological analysis of Spanish and Italian contemporary LGBT politics, this case study provides an opportunity to rethink collective action and sexual citizenship, contributing to timely theoretical and political debates. Based on extensive fieldwork and original qualitative analysis, the book suggests the notion of 'syncretic activism' as a third way of approaching the debate between assimilationism and radicalism. The notion of syncretic activism offers a synthesis of transformative, transgressive and deconstructionist approaches to identity within diversity politics. These findings have direct implications in the understanding and political potential of collective action, highlighting the complex interplay between aims, strategies and outcomes of LGBT activism in Southern Europe.

Social Movements in Latin America

This Handbook uniquely collates the results of several decades of academic research in these two important fields. The expert contributions successively address the different forms of political citizenship and current approaches and recent development

Rhyming Hope and History

This book maps complex ethical dilemmas in social justice research practices in media and communication. Contributors critically analyse power dynamics that arise when building equitable research relations with media activists, social movements, and cultural producers, considering issues of access, control, affective labour, reciprocal critiques, and movement pedagogies. Authors probe the ethical challenges faced when horizontal relations inadvertently create conflicts leading to oppressive communication; when affective demands generate non-reciprocal relations of care; and when participant anonymity has to be balanced with self-expression and voice. Chapters explore engagements with digital technologies in developing research relations, covering new research practices from horizontal collectives to dialogical auto-ethnography; from community scholarship and pedagogies to decommissioning research. The book asks researchers to consider the complexities of ethical practices today in socially engaged global research within the neoliberal university.

Social Movements and Political Activism in Contemporary Japan

Weaving together analyses of archival material, news coverage, and interviews conducted with journalists from mainstream and partisan outlets as well as with activists across the political spectrum, Deana A. Rohlinger reimagines how activists use a variety of mediums, sometimes simultaneously, to agitate for - and against - legal abortion. Rohlinger's in-depth portraits of four groups - the National Right to Life Committee, Planned Parenthood, the National Organization for Women, and Concerned Women for America - illuminates whose groups use media and why they might choose to avoid media attention altogether. Rohlinger expertly reveals why some activist groups are more desperate than others to attract media attention and sheds light on what this means for policy making and legal abortion in the twenty-first century.

Social Movements, the Poor and the New Politics of the Americas

Resistance movements to economic measures and militaristic policies have been increasing in Latin America and the Caribbean since the 1960s. Indigenous and peasant movements are advancing against the exploitation of their territories by mining, oil, and other companies, as well as movements of migrants, women, and other popular rural and urban sectors. Historical and Future Global Impacts of Armed Groups and Social Movements: Emerging Research and Opportunities is an essential scholarly publication that examines resistance and alternative movements that protest existing government systems and political injustice. Featuring a wide range of topics such as neoliberalism, social movement, and dictatorship, this book is ideal for politicians, historians, diplomats, sociologists, international relations officers, policymakers, researchers, professionals, government officials, academics, and students.
Learning and Education for a Better World

Challenging long-held theories of scientific rationality and remoteness, Kristin Shrader-Frechette argues that research cannot be ‘value free.’ Rather, any research will raise important moral issues for those involved, issues not only of truthfulness but of risk to research subjects, third parties, and the general public.

Media Activist Research Ethics

Researching the Far Right brings together researchers from across the humanities and social sciences to provide much needed discussion about the methodological, ethical, political, personal, practical and professional issues and challenges that arise when researching far right parties, their electoral support, and far right protest movements. Drawing on original research focussing mainly on Europe and North America over the last 30 years, this volume explores in detail the opportunities and challenges associated with using ethnographic, interview-based, quantitative and online research methods to study the far right. These reflections are set within a wider discussion of the evolution of far right studies from a variety of disciplinary viewpoints within the humanities or the social sciences, tracing the key developments and debates that shape the field today. This volume will be essential reading for students and scholars with an interest in understanding the many manifestations of the far right and cognate movements today. It also offers insights and reflection that is likely to be valuable for a wider range of students and scholars across the humanities and social sciences who are carrying out work of an ethically, politically, personally, practically and professionally challenging nature.

Ethics of Scientific Research

This book explores social movements and political activism in contemporary Japan, arguing that the 2011 Fukushima nuclear accident marks a decisive moment, which has led to an unprecedented resurgence in Europe and social protest movements and inaugurated a new era of civic engagement. Offering fresh perspectives on both older and more current forms of activism in Japan, together with studies of specific movements that developed after Fukushima, this volume tackles questions of emerging and persistent structural challenges that activists face in contemporary Japan. With attention to the question of where the new sense of contention in Japan has emerged from and how the newly developing movements have been shaped by the neo-conservative policies of the Japanese government, the authors ask how the Japanese experience adds to our understanding of how social movements work, and whether it might challenge prevailing theoretical frameworks.

Researching Far-right Movements

The birth of democracies owes much to the interventions and mobilizations of ordinary people. Yet many feel as though they have inherited democratic institutions which do not deliver for the people; that a rigid democratic process has been imposed from above, with increasing numbers of people feeling left out or left behind. In this well-researched volume, leading political sociologist Donatella della Porta rehabilitates the role social movements have long played in fostering and deepening democracy, particularly focusing on progressive movements of the Left which have sought to broaden the plurality of voices and knowledge in democratic debate. Bridging social movement studies and democratic theory, della Porta investigates contemporary innovations in times of crisis, particularly those in the direction of participatory and deliberative practices – crowd-sourced constitutional, referendums from below and movement parties – and reflects on the potential and limits of such alternative politics. In a moment in which concerns increase for the potential disruption of a Great Regression led by xenophobic movements and parties, the cases and analyses of resistance in this volume offer important material for students and scholars of political sociology, political science and social movement studies.

Religion, Civil Society and Democracy in Contemporary India

From the time of its first publication, ‘ Tearoom Trade ’ engendered controversy. It was also accorded an unusual amount of praise for a first book on a marginal, intentionally self-effacing population by a previously unknown sociologist. The book was quickly recognized as an important, imaginative, and useful contribution to our understanding of ‘deviant’ sexual activity. Describing impersonal, anonymous sexual encounters in public restrooms in the argot of the book explored the behavior of men whose closet homosexuality was kept from their families and neighbors. By posing as an initiate, the author was able to gain a systematic observation of homosexual acts in public settings, and later to develop a more complete picture of those involved by interviewing them in their homes, again without revealing their unwitting participation in his study. This enlarged edition of ‘ Tearoom Trade ’ includes the original text, together with a retrospect, written by Nicholas von Hoffman, Irving Louis Horowitz, Lee Rainwater, Donald P. Warwick, and Myron Glazer. The material added includes a perspective on the social scientist at work and the ethical problems to which that work may give rise, along with debate by the book’s initial critics and proponents. Humphreys added a postscript and his views on the opinion expressed in the retrospect.

The SAGE Encyclopedia of Action Research

Patient organizations and social health movements offer one of the most important and illuminating examples of civil society engagement and participation in scientific research and research politics. Influencing the research agenda, and initiating, funding and accelerating the development of diagnostic tools, effective therapies and appropriate health-care for their area of interest, they may champion alternative, sometimes controversial, programs or critique dominant medical paradigms. Some movements and organizations advocate for medical recognition of contested illnesses, as with fibromyalgia or ADHD, while some attempt to ‘de-medicalize’ others, such as obesity or autism. Bringing together an international selection of leading scholars and representatives from patients’ organizations, this comprehensive collection explores the interaction between civil society groups and biomedical science, technology development, and research politics. It takes stock of the key findings of the research conducted in the field over the past two decades and addresses emerging problems and future challenges concerning the interrelations between health movements and patient organisations on the one hand, and biomedical research and research policies on the other hand. Combining empirical case studies with conceptual discussion, the book discusses how public participation can contribute to, as well as restrict, the democratization of scientific knowledge production. This volume is an important reference for academics and researchers with an interest in the sociology of health and illness, science and technology studies, the sociology of knowledge, medical ethics or healthcare management and research, as well as medical researchers and those involved with health-related civil society organizations.

Social Movements and Sexual Citizenship in Southern Europe

This collection provides a clear analytical framework for comparison across cases that will allow us to draw useful theoretical and empirical conclusions and explore the dynamics of intersectional practice in a variety of institutional, cultural and policy making contexts.

Gendered Mobilizations and Intersectional Challenges

As extreme and far right movements become increasingly widespread in many countries, the sociology of social movements is called to confront them. This book addresses the specific challenges entailed by the empirical study of such movements, presenting case studies from Japan, Thailand, England, France, Italy, the USA, and Turkey. Based on empirical fieldwork, the chapters explore the ethics and politics of researching far right movements, considering the researcher’s reflexivity and the methodological issues raised by being emotionally linked to a research object that affirms and strives for values that differ markedly from those of the researcher. As such, it will appeal to scholars of sociology and politics with interests in social movements and research methods.

Abortion Politics, Mass Media, and Social Movements in America

Brings together international scholars across the social and behavioural sciences and education to address those ethical issues that arise in the theory and practice of research within the technologically advancing and culturally complex world in which we live.

Methodological Practices in Social Movement Research

While skepticism about the role of moral considerations in international politics has been influential within the discipline of international relations (IR), those writing on topics such as war, peace, rights and trade up until the twentieth century took seriously the importance of ethical values and moral debates. The 1990s and 2000s have seen a substantial
growth of attention to the ways in which IR conceives and analyzes themes of an ethical nature, and how issues, problems and policies involving ethics are addressed by a variety of actors within the international system. This indispensable research companion widens the perspective from ‘ethics and international relations’ to ‘ethics in international relations’, redressing the misconception that ethical concepts, principles, norms and rules are not in part constitutive of the international system and the agents acting within that system. Necessarily cross-disciplinary, expertise is drawn from IR and also philosophy, political theory, religious studies, history and law, making this an ideal volume for any library reference collection.

How Social Movements Can Save Democracy

Håvard Haarstad is a postdoctoral research fellow at the Department of Geography, University of Bergen. He has worked extensively on the political economy of natural resource extraction, and the role of social movements, civil society and labor unions in politicizing extraction. Mark Amen is graduate program director in the Department of Government and International Affairs at the University of South Florida/Tampa and Deputy Editor of Globalizations. His current research is on urban indebtedness and the global economy. Asuncion Lera St Clair, philosopher and sociologist is Research Director at the Centre for International Climate and Environmental Research in Oslo-CICERO and Associated Senior Researcher with Chr. Michelsen Institute (CMI). Her research focus is on the interface between climate change, poverty and development, with particular emphasis on justice, ethics, and knowledge productions processes.

Ruling by Other Means

How do the communication practices of governments, NGOs and social movements enhance opportunities for citizen-led change? In this incisive book, Thomas Tufte makes a call for a fundamental rethinking of what it takes to enable citizens’ voices, participation and power in processes of social change. Drawing on examples ranging from the Indignados movement in Spain to media activists in Brazil, from rural community workers in Malawi to UNICEF’s global outreach programmes, he presents cutting-edge debates about the role of media and communication in enhancing social change. He offers both new and contested ideas of approaching social change from below, and highlights the need for institutions’ governments and civil society organizations alike to be in sync with their constituencies. Communication and Social Change provides essential insights to students and scholars of media and communications, as well as anyone concerned with the practices and processes that lead to citizenship, democracy and social justice.

Research in Social Movements, Conflicts and Change

Hegel for Social Movements by Andy Blunden is an introduction to the reading of Hegel for social change activists, focusing on a non-metaphysical reading of the Logic and the Philosophy of Right.

Sisterhood and After

What ethical challenges are faced by researchers studying social and political movements? Should scholars integrate their personal politics and identities into their research? What role should activists have in shaping the purposes or processes of social scientific research? How do changing political contexts affect the ethical integrity of a research project over time? These are some of the live issues of research ethics that face students and scholars whose research subjects are located in contentious political terrain. The contributors to this volume expose their own ethical thinking as they have met such challenges head on. Each explores real dilemmas of ethical practice on the ground as they carry out research on social movements across the globe. Authors examining pro-democracy activists in Malaysia, sanctions-breakers in the Gaza Freedom Flotilla, environmental health organisations in North America and much else find that the narrow confines of Research Ethics Committees and Institutional Review Boards offer little guidance on the questions that really matter. They offer instead a demonstration of continual reflexivity that is both personal and political in its approach. This book opens up debate on research ethics, delineating challenges and offering hopeful and practical ways forward for real-world, ethical social science. This book as published as a special issue of Social Movement Studies.

The Public Shaping of Medical Research

Social movements are a key feature of the political and social landscape of Latin America. Ronaldo Munck explores their full range, emanating from different sections of Latin American society and motivated by many different concerns, including worker organizations, peasant and land reform movements, Indigenous groups, women’s movements, and environmental groups. Although the mosaic of interlocking and connected issues and rights presents a complex map of social concerns and potentially a fragmented political force, these movements are likely to be at the centre of any future progressive politics in Latin America. As a result, they require careful understanding and a more nuanced theoretical approach. Drawing on insights from Latin American approaches to social movement theory, the book offers a distinctive contribution to social movement literature. The text incorporates detailed case studies and a methodological appendix for students wishing to develop their own research agendas in the field.

Tea room Trade

Nationalist movements have become a force in contemporary American politics regardless of the political party. As social issues plague America, civilian participation in activism is experiencing a resurgence. Nationalism, Social Movements, and Activism in Contemporary Society: Emerging Research and Opportunities provides vital information on the most current issues facing the American public and political system while also exploring nationalist ideology and its application in modern politics. While highlighting the challenges facing America’s democracy and social structure, this book explores how civilians and movements are working to make progress in the current political climate. This book is an important resource for researchers, activists, political scientists, journalists, professors, students, and professionals seeking current research on nationalism, social activism, civilian protest, and the current American political climate.

Handbook of Political Citizenship and Social Movements

Social Movements is a comprehensive introduction and critical analysis of collective action in society today. In this new edition, the authors have updated all chapters with the most recent scientific literature, expanded on topics such as individual motivations, new media, public policies, and governance. Draws on research and empirical work across the social sciences to address the key questions in this international field. New edition expands on topics such as individual motivations, new media, public policies, and governance. Has been redesigned in a more user-friendly format.

Hegel for Social Movements

As extreme and far right movements become increasingly widespread in many countries, the sociology of social movements is called to confront them. This book addresses the specific challenges entailed by the empirical study of such movements, presenting case studies from Japan, Thailand, England, France, Italy, the USA, and Turkey. Based on empirical findings, the chapters explore the ethics and social structure of researching far right movements, considering the researcher’s reflexivity and the methodological issues raised by being emotionally linked to a research object that affirms and strives for values that differ markedly from those of the researcher. As such, it will appeal to scholars of sociology and politics with interests in social movements and research methods.

Researching Far-Right Movements

A new study of the personal, political, and institutional impacts of social movements.

Research Ethics and Social Movements

Action research is a term used to describe a family of related approaches that integrate theory and action with a goal of addressing important organizational, community, and social issues together with those who experience them. It focuses on the creation of areas for collaborative learning and the design, enactment and evaluation of liberating actions through combining action and research, reflection and action in an ongoing cycle of cogenerative knowledge. While the roots of these methodologies go back to the 1940s, there has been a
dramatic increase in research output and adoption in university curricula over the past decade. This is now an area of high popularity among academics and researchers from various fields—especially business and organization studies, education, health care, nursing, development studies, and social and community work. The SAGE Encyclopedia of Action Research brings together the many strands of action research and addresses the interplay between these disciplines by presenting a state-of-the-art overview and comprehensive breakdown of the key tenets and methods of action research as well as detailing the work of key theorists and contributors to action research. To watch a video of editor David Coghlan discuss the importance of this major reference work as well as the implications, challenges and successes of editing The SAGE Encyclopedia of Action Research, click here: http://youtu.be/P5yqCJ7ZGCs

Research in Social Movements, Conflicts and Change

This book considers how global capitalism affects fragile peace processes in countries suffering under years of violent conflict. While these countries benefit from few of the resources made available through a global economy, they are nonetheless woven within, and reliant upon, the economic and political relationships such an economy demands. By including the work of anthropologists, economists, religious studies experts, sociologists and political scientists, this book presents a broad yet thorough exploration of the complexities of peacebuilding in a free market. "Much of the current research on peacebuilding focuses on domestic factors while failing to take into account both the international political context and the pressures of market liberalization on fragile peace processes," the editors write. "Indeed, what are apparently localized conflicts depend upon resource flows that extend well beyond national borders." Included in the text are specific studies of Africa, Asia, and the Middle East as well as considerations of conflicts on the global scale.

The Ashgate Research Companion to Ethics and International Relations

Rhyming Hope and History exposes the frayed relations between activism and social movement scholarship and examines the causes and consequences of this disconnect between theory and practice. Both scholars and activists explore solutions, weighing the promise and perils of engaged theory and the barriers to meaningful collaboration. This volume asserts that partnerships among scholars and activists benefit both academic inquiry and social change efforts. Contributors: Kevin M. Carragee, Suffolk U; Catherine Corrigan-Brown, U of California, Irvine; Myra Marx Ferree, U of Wisconsin, Madison; Richard Flacks, U of California, Santa Barbara; Adria D. Goodson; Richard Healy and Sandra Hinson, Grassroots Policy Project; David Meyer, U of California, Irvine; Cynthia Peters, Worker Education Program of the Service Employees International Union, Local 2020; Barbara Risman, North Carolina State U; Robert J. S. Ross, Clark U; Leila J. Rupp, U of California, Santa Barbara; Cassie Schweerner, Schott Foundation; Valerie Spering, Clark U; David A. Snow, U of California, Irvine; Verta Taylor, U of California, Santa Barbara. David Croteau is formerly associate professor of sociology and anthropology at Virginia Commonwealth University. William Hoynes is professor of sociology and director of media studies at Vassar College. Charlotte Ryan is codirector of the Media Research and Action Project at Boston College. William A. Gamson is professor of sociology at Boston College.

Historical and Future Global Impacts of Armed Groups and Social Movements: Emerging Research and Opportunities

The growing presence of social media and computer use has caused significant changes to community engagement. With the ubiquity of these technologies, there is increasing engagement in social and political policies and changes. Online Communities as Agents of Change and Social Movements is a pivotal reference source for the latest research on relevant theoretical and practical frameworks regarding online communities and social media as agents of social and political change. Featuring extensive coverage on relevant areas such as computer use, online engagement, and collective action, this publication is an ideal resource for researchers, academics, practitioners, and students in the fields of social psychology, social network analysis, media studies, information systems, and political science.

The Handbook of Social Research Ethics

This ground-breaking history of the UK Women's Liberation Movement examines the movement's shape and strategy as well as the conditions that gave rise to it. Through personal stories of key activists, the politics of experience is sympathetically evaluated in the context of iconic moments of the movement. It urges today's activists to engage anew with feminist memory in shaping new political futures.

The Consequences of Social Movements

In Masters Not Friends, Mubhurin Rizvi lends a historical and ethnographic perspective to the rise of one of the largest, most successful land rights movements in South Asia, the Anjuman Mazarin Punjab (AMP), who, against all odds, successfully resisted the Pakistani military and made a case for their moral right to farmland. The case of AMP provides a unique lens through which to examine state and society relations in Pakistan, and bridge literatures from subaltern studies, military studies, study of power, colonial technology and governance, and the language of claim-making. More broadly, Rizvi offers a glimpse of Pakistan that contrasts with its standard framing as a hub of radical militancy and terrorism.

Social Movements

This book maps complex ethical dilemmas in social justice research practices in media and communication. Contributors critically analyse power dynamics that arise when building equitable research relations with media activists, social movements, and cultural producers, considering issues of access, control, affective labour, reciprocal critiques, and movement pedagogies. Authors probe the ethical challenges faced when horizontal relations inadvertently create conflicts leading to oppressive communication; when affective demands generate non-reciprocal relations of care; and when participant anonymity has to be balanced with self-expression and voice. Chapters explore engagements with digital technologies in developing research relations, covering new research practices from horizontal collectives to dialogical auto-ethnography; from community scholarship and pedagogies to decolonising research. The book asks researchers to consider the complexities of ethical practices today in socially engaged global research within the neoliberal university.

The Ethics of Staying

Offers a new perspective on the relationship between states and social movements in authoritarian and semi-authoritarian contexts.

Online Communities as Agents of Change and Social Movements

Social movement studies have grown enormously in the last few decades, spreading from sociology and political science to other fields of knowledge, as varied as geography, history, anthropology, psychology, economics, law and others. With the growing interest in the field, there has been also an increasing need for methodological guidance for empirical research. This volume aims at addressing this need by introducing main methods of data collection and data analysis as they have been used in past research on social movements. The book emphasises a practical approach, presenting in each chapter specific discussions on the main steps of research using a certain method; from research design to data collection and the use of information. Indigo so, dilemmas and choices are presented, and illustrated within chapters following the same systemic approach.

Frames of Protest

Research in Social Movements Conflicts and Change showcases deeply empirical and often multi-method research by senior and junior scholars alike. Comparative analysis and qualitative case studies push into new territories in this illuminating and important research which seeks to define and advance the multiple fields reflected in the series title.

Communication and Social Change

A radical anthropologist studies the global justice movement.

Direct Action
This is a book for activists, students, scholars of social movements and adult education and for the public interested in the contemporary movements of our times. From the streets of Barcelona and Athens, the public squares in Cairo, Tunis and Tripoli, the flash mobs and virtual learning of the #Occupy movement, and the shack dwellers of South Africa, people around the world are organising themselves to take action against the ravages of a capitalism that serves the greedy while impoverishing the rest. Social movements have arisen or re-arisen in virtually every sector of human activity from concerns about the fate of our planet earth, to dignity for those living with HIV/AIDS, to feeding ourselves in healthier ways and survival in places of violent conflict. At the heart of each of these movements are activists and ordinary people learning how to change their lives and how to change the world. This book offers contemporary theoretical and practical insights into the learning that happens both within and outside of social movements. Social movement scholars present work linked to the arts, to organic farming, to environmental action, to grassroots activists in the Global South, to the Arab Spring, the Occupy movement, the shackdwellers movements, school reform and the role of Marx, Gramsci and Williams in understanding social movement learning. The greatest contribution of this inspiring book is to remind us that learning and education in social movements help to make a difference. Not only does this collection enable us to understand how we might theorise and historicise learning in diverse contemporary social movements, but its contributors do so with outspoken and passionate commitment to ‘Learning and Education for a Better World’. - Professor Miriam Zukas, Executive Dean, Birkbeck, University of London

The burning demand for such a text comes from our contemporary moment that is witness to a world where nearly everything is commercialised, marketised or commodified. This text shuns an essentialist discourse while simultaneously and masterfully offering unprecedented insights into social movement learning and education. The book isnuminous. - Professor Robert Hill, University of Georgia, USA

This is a book we have all been waiting for. The editors have brought together an amazing cadre of international adult educators to probe the intersection of social movements and learning, and to build theory around the many social actions that are taking place globally. A must read for students and professors everywhere. - Leona English, PhD, St. Francis Xavier University, Antigonish, NS, Canada

Accessible, engaging, often inspirational, the essays that comprise Learning and Education for a Better World offer deep insights on the role of social movements as agencies of learning, struggle and transformation. From case studies that include the occupy movement, popular education in Latin America, political cinema and the Egyptian Revolution to reflections on resistance, aesthetics and the role of organic intellectuals, this collection will be of interest to educators, social scientists, humanists and activists alike. An interdisciplinary tour-de-force. - Professor William Carroll, University of Victoria, Canada

This is such a timely collection of essays, bringing together critical reflections on experiences of social action from across the globe. This book is to be commended to the widest possible readership. - (From the Preface by) Emeritus Professor Marjorie Mayo, Goldsmith's College
